

PROFILE

Engineer with 2.3 years of experience as a Python developer, specializing in backend technologies using Python, Django, and MySQL/SQLite databases, with a strong understanding of Django's ORM, URL routing, and template engine.

TECHNICAL SKILLS

- | | |
|-------------------------|---|
| • Programming Languages | Python, SQL |
| • Frameworks | Django |
| • Databases | MySQL, SQLite |
| • Version Control | Git, GitHub |
| • Web Development | HTML, CSS, JavaScript (Basic Knowledge) |

EXPERISNCE

Engineer

CDAC (Centre for Development of Advanced Computing)

Jan 2023 – Present

CSAM-Detection World Wide Web

- **Developed a python-based** images/video categorization tool with a user-friendly graphical interface using Tkinter and OpenCV.
- Categorize image/video into predefined categories.
- Automatically move categorized image/video to the corresponding folders for organized storage.
- Provided a seamless experience with automatic image/video loading, categorization, and real-time frame updates.
- Developed automated scripts to simplify tasks, including a **Python**-based duplicate image detection system.
- Engineered a data processing pipeline for a 30% increase in data throughput, leveraging Python and enhance system scalability at CDAC.

Employees Attendance System

- **Django-based Employee Attendance System** for managing employees, tracking attendance, and generating reports.
- Developed secure login and authentication using Django's built-in authentication system.
- Implemented attendance marking with real-time validation, role-based authentication, and automated record-keeping using Django ORM.

CAS-Centralized Attendance System

- Provide detailed instructions to clients on how to use the CAS-Centralized Attendance System.
- Respond to client queries via email, addressing any issues.
- Send relevant information and updates through email as part of client support.

EDUCATION

MSc in Electronic and Embedded System

Jan 2020 – Nov 2022

University of Mumbai
